Visit the App Store or Google Play Store to search for and download our app 'myFirst Circle.' This will enable you to effortlessly experience our services and features.

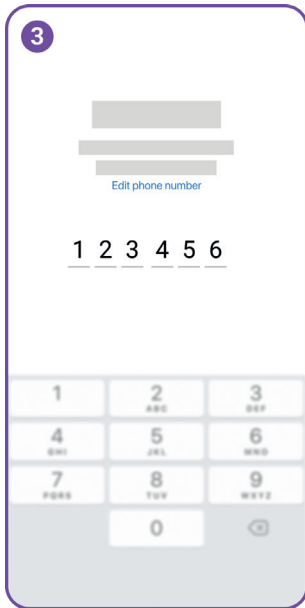

To start using myFirst Circle, log in using your Google, Facebook, or Apple ID credentials.

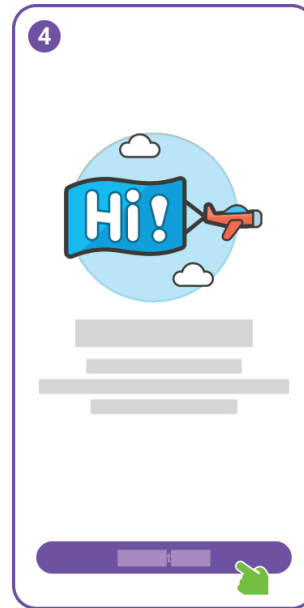

Existing users can simply click on 'Login' and use your phone number to login.

For new user registration, you will need to provide your phone number.

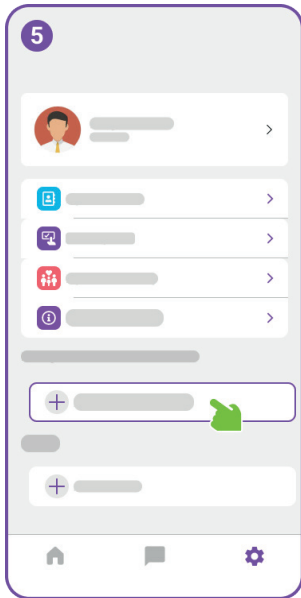

We will send a One Time Password (OTP) to the phone number entered. Please enter the OTP to verify your phone number.

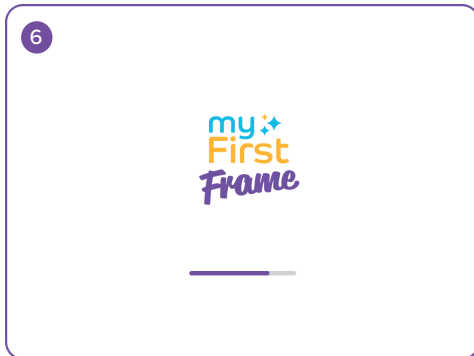

Congratulations, you have successfully completed the user registration.

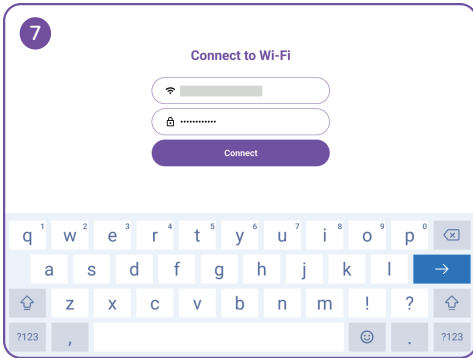

Next, please add the Frame to access additional features.

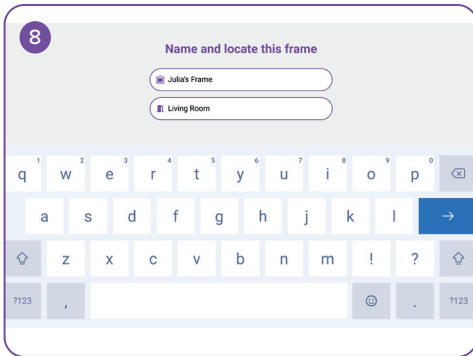

In the Setting menu, click on the 'Add Device' button.

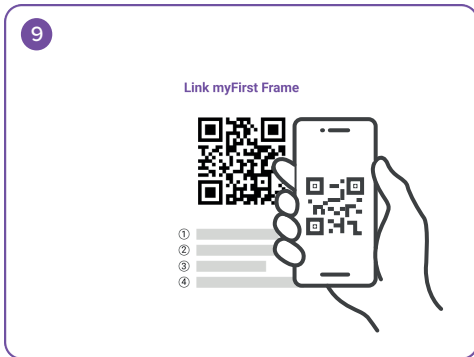

Next, connect the myFirst Frame to power and proceed to the startup screen.

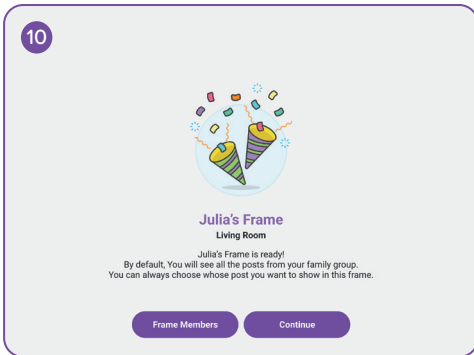

Next, you will enter the Wi-Fi connection page. Enter the Wi-Fi name and password as the Frame requires an internet connection for setup.

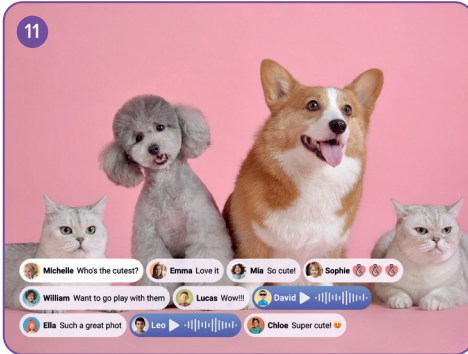

Give your myFirst Frame a unique name and choose a room for its placement.

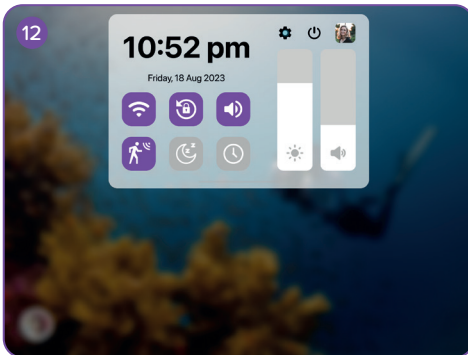

After naming your Frame, back to the myFirst Circle app on your mobile phone, click on the 'Add Device' button and scan the QR code on the Frame in the Setting page.

Congratulations on successfully adding myFirst Frame! Now you can capture and cherish your precious memories.

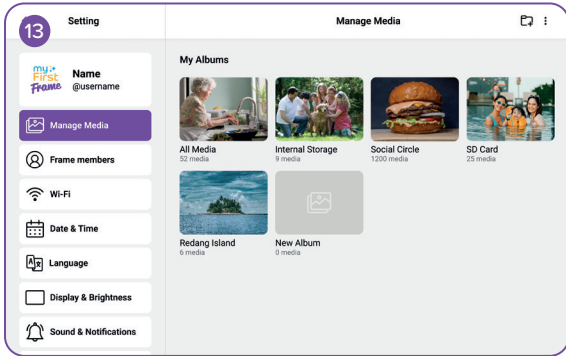

Open the myFirst Circle app, click on the "+" icon, and share your first post. The content is synchronized on both Frame and myFirst Circle app in real-time.

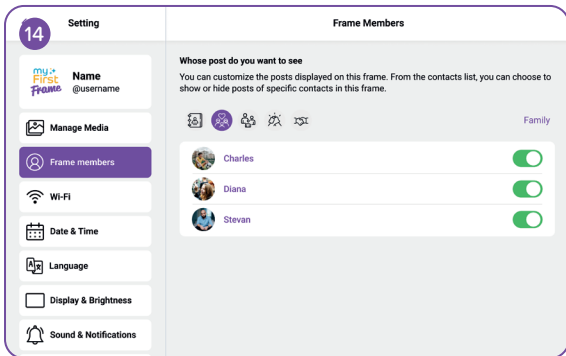

Swipe down from the top of the main interface to reveal the menu. Here, you can toggle the motion sensor. When the motion sensor is activated, the screen will light up when someone approaches and go into sleep mode when someone moves away.

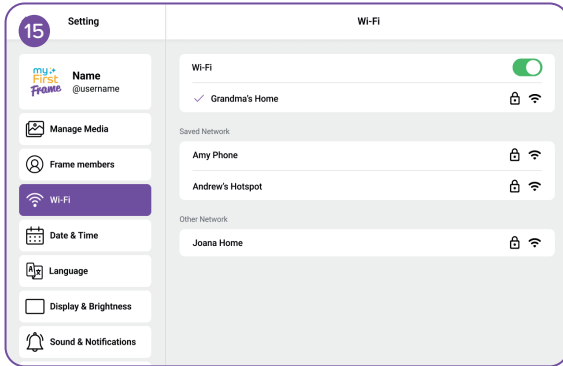

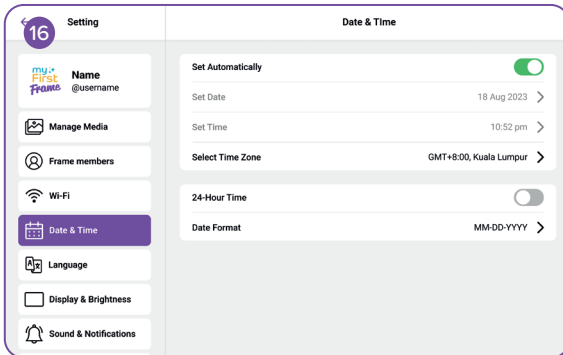

Click on the 'Manage Media' page to manage your photos or videos.

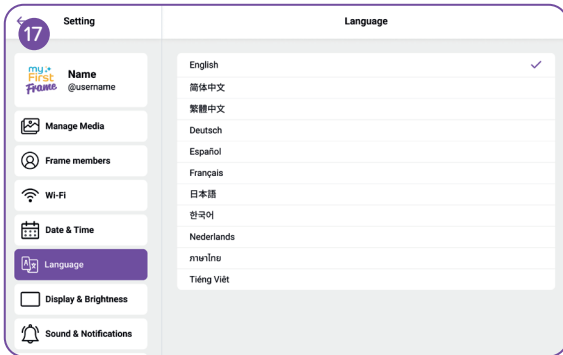

On the 'Frame Members' page, you are able to set permissions for members.

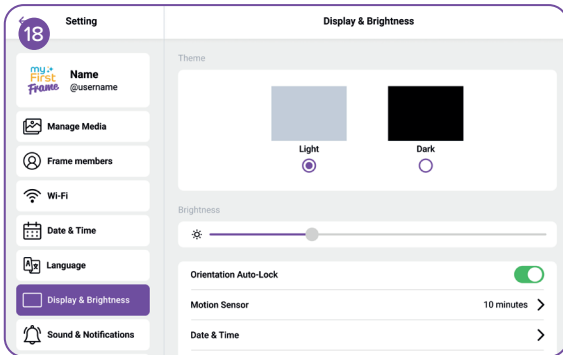

On the 'Wi-Fi' page, you can connect to your preferred Wi-Fi network. Additionally, you can turn Wi-Fi on or off.

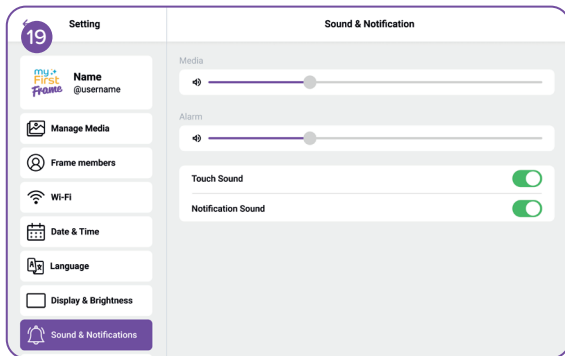

On the 'Date & Time' page, you can adjust the time zone and date & time settings.

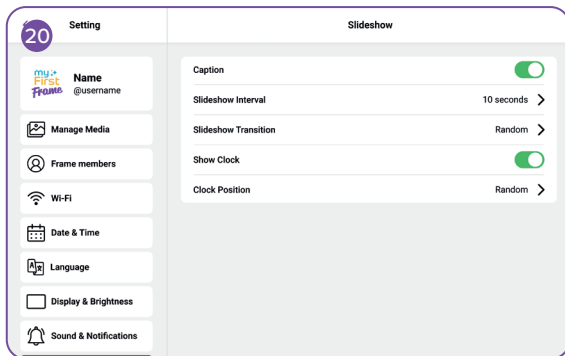

To select the preferred language from this supported list, it's going to be used for the system language.

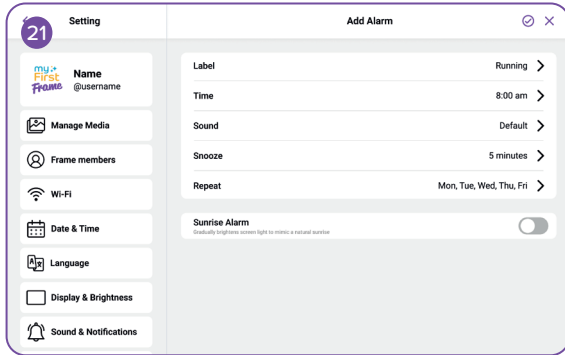

Click on the 'Display & Brightness' page to adjust the theme color, brightness, and toggle screen rotation.

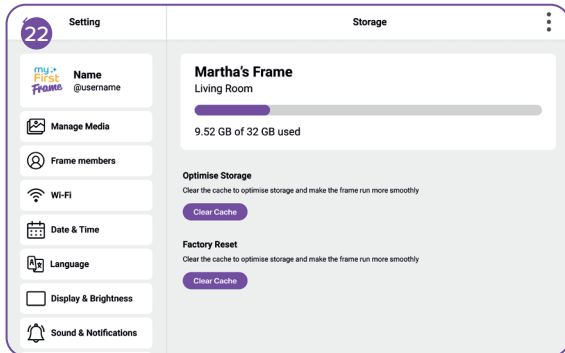

Click on the 'Sound & Notification' page to adjust the volume and turn on or off the sound for alarms and media.

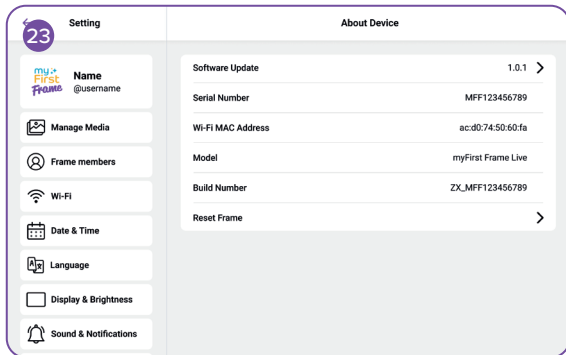

Click on the 'Slideshow' page to switch between play modes and adjust the Slideshow Interval or Slideshow Transition.

On 'Alarm' page, you can set your alarm and toggle the Sunrise Alarm, which displays corresponding visuals based on the time.

On 'Storage' page, you can check the memory status.

Click on the 'About Device' page to check the current software version of the Frame. You can also tap to initiate an OTA (Over the Air) update to the latest version.
